CAREER OBJECTIVE

Software engineer with 2+ years of commercial experience building and shipping production features at scale, with a strong background in full-stack development (React, Node.js, TypeScript) and applied AI/ML engineering. Completing a Bachelor of Software Engineering (AI Engineering major) at Torrens University Australia, graduating December 2026. Seeking internship and graduate software engineering roles from early 2027.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL **Frontend:** React.js, Next.js, Hooks, Context API, Redux, Tailwind
Backend: Node.js, Express.js, REST APIs, JWT Auth, MVC **Databases:** MongoDB, MySQL, Firebase Firestore
Cloud: Firebase Auth & Hosting, GCP (basics) **AI / ML:** scikit-learn, Pandas, NumPy, OpenCV, NLP, Regression
Tools & Practices: Git/GitHub, GitHub Actions (CI/CD), Postman, JIRA, Agile/Scrum, Code Review, SDLC

PROFESSIONAL EXPERIENCE

Junior Full-Stack Developer, DoppelMate · LemedoIt Inc.

2023 – 2024

Remote | React · Node.js · Express · Firebase · MongoDB · JWT | 30,000+ active users

- **Designed and deployed 4 end-to-end production features:** JWT authentication, user registration, reporting & blocking, and community matching, on a live platform serving 30,000+ active users.
- **Engineered RESTful APIs across a React / Node.js / Express stack**, directly supporting 2× user growth within 3 months of launch. Collaborated with senior engineers through PR reviews and Agile sprint cycles to enforce production code quality.
- **Reduced production downtime by diagnosing and resolving critical bugs** across staging and live environments, sustaining platform reliability for a rapidly scaling concurrent user base of 30,000+.
- Delivered features consistently within Agile/Scrum workflows: sprint planning, standups, and continuous releases.

EDUCATION

Bachelor of Software Engineering, Torrens University Australia, Sydney NSW

Expected: Dec 2026

Major: Artificial Intelligence Engineering · Minor: Data Science & Data Analytics

PROJECTS

ASX Stock Price Prediction — ML Regression Pipeline

2025 – Present

github.com/okayswik/ASX_Predict | Python · scikit-learn · Pandas · NumPy

- **Engineered an end-to-end ML regression pipeline** to forecast ASX stock prices across multi-year historical data; applied feature engineering and EDA, then benchmarked linear and ensemble models on RMSE and R² to select the highest-accuracy predictor.

HiCar — TypeScript Car Rental Platform

2024

github.com/okayswik/hicar | TypeScript · React | 87.8% TypeScript coverage

- **Architected a type-safe frontend with 87.8% TypeScript coverage**, enforcing strict interface definitions and typed props to eliminate runtime errors and demonstrating production-grade frontend engineering practices.

AI Engineering — Computer Vision & Speech Recognition

2024 – Present

github.com/okayswik | Python · OpenCV · SpeechRecognition · NLP · Audio Processing

- **Built a real-time facial recognition system (OpenCV) and a separate end-to-end speech-to-text pipeline** integrating audio capture and NLP transcription, both built independently from scratch, reflecting production AI engineering patterns.

Amazon Clone — Full-Stack E-Commerce Application

2024

github.com/okayswik/amazon-clone | React · Context API · Firebase Auth · Firestore · Firebase Hosting

- **Architected and deployed a full-stack e-commerce app** with cart, checkout, and listings across 10+ React components; integrated Firebase Auth, Firestore for real-time state, and deployed to Firebase Hosting with optimised bundling.

CERTIFICATIONS & COMMUNITY

Node.js Developer Complete Course, Udemy (2024) | AI2Go Workshop, Fusemachines Inc. (2024) | Member, Google Developer Group (GDG) Sydney (2024–Present)
